

Situated in one of the busiest and centralised locations of Bhubaneswar at Vani Vihar Square, the IIPM campus is distinctly visible to one and all. With growing importance of this east Indian state capital as a centre of business and trade, a demand for qualified management graduates have been observed in the recent past. IIPM thus set up its second centre in East India at Bhubaneswar in 2009. The IIPM centre here draws inspiration from the IIPM legacy and offers its students the same IIPM experience as offered elsewhere with the added advantage of bringing the institute closer to students in the state of Orissa.

Infrastructure:

With around 28000 sq ft built-up area, the IIPM Bhubaneswar Tower is one of the most trendy architectural landmark in this part of the city. The campus currently has a set up of 9 classrooms along with a big auditorium which can accommodate up to some 150 students in a single shift. Each of these facilities is equipped with an LCD projector and all the other basic classroom amenities. The library is stocked with around 5000 management titles covering books, magazines and journals. A student recreation zone has also been set up in the campus to help the students ease their stressed mind after regular classroom hours. As a part of indoor recreation, students get an option to play pool or table tennis or other indoor games like carom or chess in

Dean : Prof. Ranjan Sen

the student zone. The campus is also equipped with complete Wi-Fi connectivity to enable students to stay connected with the rest of the world at push of a button. After a day well spent exercising the mind, many of the students prefer to drop in at the gymnasium area to give their mind a little rest and perk up their physique – all this under the watchful eyes of a certified gym instructor.

Faculty:

The faculty members in the campus comprise of a highly talented pool of individuals who bring with them an equitable blend of academics and industry experience. The faculty members immensely contribute in the development of the students - inside and outside the classrooms. Many of the faculty members are found spending time with the students in the cafeteria area, engaged in light hearted chats and some serious discussions. Post lecture sessions are also spent brainstorming newer business ideas or working on joint research projects taken up for the corporate world as consulting assignments. Students and faculty members alike, group up in the library, scanning through documents, research reports and journals in developing intellectual contents. Faculty members at IIPM Bhubaneswar also spend qualitative time mentoring students to shape their future corporate career.
