

The IIPM tower in NOIDA is nestled in one of the fastest growing institutional sectors in the close proximity of leading corporate organizations and MNCs. Located in Sector 62 C, the IIPM campus, one of the newest to be set up in 2009, truly reflects the spirit of IIPM's academic pursuit. The 8 storey structure stands tall and high looking far and wide beyond the realm of traditional management education. The strategic location of the campus near the bustling Electronic City on one side and the industrial belts of Ghaziabad and Bulandshahar on the other, provides students with immense opportunity to regularly visit and explore different types of organisations in the vicinity.

Infrastructure:

The IIPM Noida campus provides its students with the same IIPM experience as elsewhere. With 6 standard classrooms, all equipped with the latest presentation gadgets and the entire building completely Wi-fi enabled, students prefer to stay back and spend more time on campus completing their research assignments or giving final touches to their presentation skills. The admission block is

located on the ground level while the academic sections are located in the floors above. Students get to relax at the cafeteria located in the basement or work out after college hours in the fully furnished multi-gymn just next to it. The basement also houses the huge and well stocked library apart from the administrative section. The IIPM campus is also shared by IIPM Think Tank's publication and research section that contributes articles in leading Planman Media magazines. This creates an excellent opportunity for the students at the institute - an environment doubling as a centre for academic learning and a centre which regularly hosts intellectual discourses by corporate leaders, social and political figures and foreign diplomats, making learning a truly memorable experience at IIPM.

Dean : Prof. Karun Sabbarwal

Faculty:

Most of the faculty members travelling to IIPM Delhi and Gurgaon, also visit the campus at Noida. The campus hosts a great mix of seasoned academicians with years of academic experience on one hand and young corporate achievers having a passion to share their learning, on the other. Professionals from the corporate world frequent the IIPM Noida campus because of its proximity with the corporate heartland in this part of the city. In addition to these visiting professors at the campus, students also get exposed to a breed of young and dynamic permanent faculty members, most of whom are engaged in economic, business and financial researches for IIPM Think Tank, which is also headquartered at the IIPM Noida campus. These permanent faculty members most often take some of the core IIPM papers like Executive Communication and National Economic Planning, apart from spending considerable amount of time grooming and mentoring the students and preparing them for future corporate and career challenges.
